# SHILLING BREWING Co.

Opening in June 2016, we were the first bar in Glasgow to serve beer direct from tanks, but the beer we're serving isn't shipped in from anywhere else. It's brewed right behind the bar. We believe that this guarantees you the freshest pint in Glasgow.

We're also the only true small-batch micro-brewery in the city centre. The beauty of brewing in such small batches is that we can react quickly to any feedback about our beers, and tweak our recipes accordingly. It also enables us to be experimental with the styles and flavours we use in our rotational brews.

We aim to have something new from our in-house brewery for you to try, and we're always striving to perfect our product. If you can't decide, we offer a tasting flight of 4 of our Shilling-brewed beers for only £5.

At our maximum capacity, Shilling boasts 31 draught beer lines, the most extensive rotational draught range in Scotland. Our guest beers change on a daily basis, so make sure you follow us on Untappd to be the first to hear about any new beers we have on offer!
